Introduction

On behalf of the *British Journal of Cardiology* (BJC) Editorial Board, thank you for your interest and continuing marketing investment.

Such support helps strengthen our position as the leading UK peer-reviewed cardiometabolic medicine journal and we are proud that we have been asked to be the official journal for the associations listed opposite.

The BJC uniquely links primary and secondary care by providing:

- High quality peer-reviewed clinical reviews and original clinical research articles
- Educational support, professional development and patient care guidelines
- Editorial features, opinions and commentaries
- International and domestic conference news
- Professional best practice discussions

By utilising any of our cost-effective, multi-media opportunities, you help to provide our circulation of professional readers in print and online (who now number 18,000) with quality content including:

- Editorials – frank and free ranging UK and European perspectives
- Clinical papers – audit, practice reviews, clinical studies, imaging techniques, rehabilitation and primary care
- Drug reviews – new and established compounds assessed by key opinion leaders
- Referral - management advice for the primary care team
- Case reports
- Medical images
- News – clinical trial data, guidelines and topical issues
- Global and UK congress and meeting reports
- Podcasts
- Medical humour
- Letters and diary

The British Journal
of Cardiology is
the official journal of

British Association for
Cardiovascular Prevention
and Rehabilitation

British Association
for Nursing in
Cardiovascular Care

British Association for Nursing
in Cardiovascular Care

British Heart Valve Society

British Hypertension
Society Information Service

British Junior
Cardiologists' Association

Cardiorenal Forum

CardioVascular General
Practitioners

HEART UK – The Cholesterol
Charity

National Obesity Forum

Scottish Heart and Arterial
Risk Prevention Group

UK Stroke Forum

The Journal & Websites

Leading opinion for over 20 years, The British Journal of Cardiology publishes medical, interventional and therapeutic development content of interest to the community that includes:

- Arrhythmias
- Heart failure
- Coronary artery disease
- Hypertension and stroke
- Coronary intervention and surgery
- Prevention and rehabilitation
- Dyslipidaemia
- Paediatric cardiology / adult congenital heart disease
- Diabetes and cardiorenal medicine
- Imaging

BJC Online is a well-designed, clear and fully interactive website for our rapidly growing community of active online users who now number 253,000. Exclusive online content includes all articles published ahead of print with a 13-year archive of articles, podcasts, regular topical newsletters and BJC Learning – our educational resource for continuing professional development.

Our sister websites cater for more specialist interests. BJC Arrhythmia Watch gives the latest news and views on cardiac rhythm management. The Cardiorenal Forum targets healthcare professionals involved in the management of patients presenting with a primary cardiovascular or renal problem.

Growing community

We are delighted that our online resources are enabling the BJC to reach healthcare professionals far beyond our traditional print readership. In the past five years, unique online visitors have increased more than eight-fold. Page views on our site in 2014 increased to over 569,000. Our modern design enables content to be readily accessible and easy to read by tablet and mobile phone users, who now account for a fifth of our visits.

Our highly respected content can now be reached worldwide, with increasing demand from international pharma to distribute key articles and reviews to both emerging and more developed markets.

With continuing industry partnership and support of both our print and online resources, we look forward to extending our efforts to meet the educational demands of our cardiovascular colleagues. We hope this helps in your own continued commercial success.

Print & Online Readership

The print circulation includes:

- Hospital cardiologists (all grades) and allied disciplines, e.g. cardiothoracic and vascular surgeons, consultants in diabetology, renal medicine and care of the elderly, and nurse consultants
- General practitioners including GPs with a special interest in cardiovascular medicine, all CHD clinics, CHD leads, diabetes leads, renal leads, high prescribers, and selected nurses working in primary care CHD clinics

Thousands more readers access the journal online

The BJC is the official journal and circulated to the membership of the:

- **CardioVascular General Practitioners:** formerly the National GPSI Cardiology Forum, and now renamed CVGP (CardioVascular General Practitioners: the Society for GPs with an interest in Cardiovascular Medicine), it provides specific clinical education, continuing professional development, support and representation at policy level to all GPs involved in cardiovascular care.
- **HEART UK:** a charity set up to support all those at risk of inherited high cholesterol and cardiovascular disease, with a professional division for health professionals who care for people with lipid abnormalities.
- **Scottish Heart and Arterial Risk Prevention Group:** a charity providing education and research for doctors and nurses concerned with tackling the problem of premature illness and death due to cardiovascular disease.
- **National Obesity Forum:** a charity established to raise awareness of the growing impact of obesity and overweight on patients and the NHS.
- **British Junior Cardiologists' Association:** the national body representing the interests of junior cardiologists for training, education and research issues.
- **UK Stroke Forum:** hosted by the Stroke Association, the UKSF is a coalition of over 30 organisations committed to improving stroke care in the UK. It aims to bring together healthcare professionals to meet and share ideas, and also enables patients to meet stroke professionals and help shape future services.
- **Cardiorenal Forum:** an independent group set up to highlight the important clinical overlap that exists between patients presenting with a primary cardiovascular or renal problem.
- **British Hypertension Association Information Service:** a provider of information to doctors, nurses and other healthcare professionals who work in the field of hypertension and cardiovascular diseases.
- **British Association for Cardiovascular Prevention and Rehabilitation:** an association concerned with the practice and philosophy of cardiac rehabilitation. It produces national guidelines and develops educational programmes and professional training systems in this field.
- **British Heart Valve Society:** A specialist group which draws on all disciplines relevant to valve disease, examining both the wider issues and those immediately related to clinical practice.
- **British Association for Nursing in Cardiac Care:** a forum for communication, professional development and national representation for all nurses in Britain who are involved in the care of cardiovascular patients.

Supplement & Highlight Reports

Regular supplements and highlight reports to the main journal are published providing sponsors with the opportunity to have their name affiliated with BJC material. Whilst editorially independent, presentation and delivery can be tailored to a company's specific needs.

These supplements provide a unique marketing opportunity to reach key opinion leaders and prescribers and will emphasise a sponsor's interest in progressing research in the field of cardiology.

The BJC supplement are published online and sent out with the journal. Additional copies can be made available for sponsored distribution by sales forces or for exhibition booth display.

BJC Reprints

Reprints of peer-reviewed articles under the auspices of the BJC provide a highly effective opportunity for dissemination of key messages.

Supplement and reprint enquiries should be directed to:

Henry Purcell
hpurcell@bjcardio.co.uk

Katharine White
kwhite@bjcardio.co.uk

T: +44 (0)20 7731 4945

Meetings

The BJC has a wealth of experience in running high calibre and highly successful educational meetings. The BJC is uniquely placed, with its prestigious editorial board, to organise innovative educational initiatives including round table meetings and symposia. We can organise the recruitment of faculty, moderator and delegates from our extensive readership database. We organise the Annual Scientific Meeting of the Cardiorenal Forum, meetings for the Cardiometabolic Forum and smaller postgraduate meetings throughout the year.

As well as pre-event promotion within the journal and online, we offer a rapid and skilled dissemination of information through publication of highlight reports, supplements, podcasts and e-newsletters, amongst other post-meeting opportunities.

The BJC has an excellent reputation with leading pharmaceutical companies for the publication of high-quality review supplements, meeting reports and podcasts on therapeutic areas.

Meeting enquiries should be directed to:

Henry Purcell

Our past clients include:

BJC Learning

Our great free educational resource BJC Learning is fast becoming a popular solution for the continuing professional development requirements of today's healthcare professionals. Offering comprehensive elearning courses on key clinical areas and written by experts, with endorsement by professional bodies, programmes include:

- Angina, endorsed by HEART UK and the British Junior Cardiologists' Association
- Anticoagulation, endorsed by Anticoagulation Europe, Arrhythmia Alliance and the Atrial Fibrillation Association
- Heart failure, endorsed by the British Society for Heart Failure
- Heart valve disease, endorsed by the British Heart Valve Society
- Obesity, endorsed by the National Obesity Forum
- Pulmonary hypertension, endorsed by PHA Europe

Individual modules on more niche topics can also be supported.

This has all been made possible with the support of pharma, who have provided educational grants for these independent programmes ensuring delivery of best practice.

Comments from past users include

“Well written, clear and useful information”

“Will recommend as a training module for the Trust”

“Very relevant to current practice”

“It has given me great confidence”

“Informative and concise”

“Relevant, instructive, succinct and practice-based”

“Comprehensive and up-to-date information”

“Great for CPD and revalidation”

“Thank you for this great free resource”

“A good overview with relevant links to other literature”

BJC Learning offers:

- Partners the opportunity to support educational initiatives
- Best practice guidance from expert writers
- Endorsement by professional bodies
- CPD points for users where and when they want
- Certificates for revalidation

Digital Opportunities

BJC online, www.bjcardio.co.uk, which incorporates BJC Learning, www.bjcardio.co.uk/learning, is a fully interactive resource for our rapidly expanding community of over 18,000 registered profiled professional users and over 253,000 unique visitors per year. Our sister websites, BJC Arrhythmia Watch, www.arwatch.co.uk and the Cardiorenal Forum, www.cardiorenalforum.com, attract more specialist visitors to their sites.

Sponsorship options of these independent peer-reviewed digital resources include:

- Leaderboard and skyscraper banner advertising on the websites
- Skyscraper banner advertising on monthly newsletters alerting new online content
- Sponsorship of our 'Focus' newsletters in particular therapeutic areas
- Custom delivered podcasts
- Custom educational CME/CPD modules and supplements

Features include:

- Regular issue content that can be searched, browsed and read online
- Breaking international cardiovascular news
- Digital supplements and linked cardiovascular resources

Benefits to our online registered users:

- Newsletter alert to new content
- Print and download all content
- Historical archive
- Topical 'Focus' newsletters
- Modular programmes for CPD activity
- Access to podcasts reviewing major meetings

Current prescribing of statins and persistence to statins following ACS in the UK: a MINAP/GPRD study

March 2012 Br J Cardiol 2012;19:24 doi: 10.1093/bjcc/19.2.24

Authors: Rachel Grogan, Susan Eaton, Adam Timmis, Harry Hemingway, Zahava Gabriel, Isabel Mirano, David P van Staa

National Institute for Health and Clinical Excellence (NICE) guideline CG67 recommends that acute coronary syndrome (ACS) cases are treated with high-intensity statins (defined as statins used in doses that produce greater cholesterol lowering than atorvastatin 40 mg). The objective of this study was to describe current UK prescribing of statins following ACS. This study used data from linkage between the Myocardial Ischemia National Audit Project (MINAP) database and the General Practice Research Database (GPRD). The study included adults aged 40+ with a discharge diagnosis in MINAP of myocardial infarction, ischaemic positive or negative ACS discharged alive to home. A total of 6,138 ACS cases were included. Most ACS cases were prescribed both a statin at hospital discharge and by their GP, however, 340 of the 6,138 ACS cases (5.5%) had no record of statin prescription from either source. Of the ACS cases prescribed a statin by their GP, 30.1% received a high-intensity statin dose. At year four, 45% (95% confidence interval [95% CI] 41–49%) of ACS cases prescribed a statin remained on treatment (42% for those starting low and 48% for high intensity). In conclusion, statin therapy is provided to most ACS cases in the UK but duration and dosage is shorter and lower than recommended.

Renal denervation for hypertension: where are we now?

Hish C Patel, Carlo Di Mario

Despite promising initial results with renal denervation (RDN), there is a lot more work to be done before its role in the management of hypertension is set in stone, according to this review from the Royal Brompton Hospital, London. The authors compare the various available devices, and call for more studies powered to assess the impact of therapy on mortality and long-term blood pressure control.

FOCUS ON ANTICOAGULATION BJC The British Journal of Cardiology

December 2013 This is for UK healthcare professionals only

Dear Colleagues,

Our latest newsletter highlights studies presented at the Heart Rhythm Congress (HRC) 2013 meeting held in Birmingham, from 26th–29th September 2013.

Palpitations – sinister or benign?

When are palpitations benign and when do they signal high risk? This theory issue was addressed by Ms Angela Hall, Lead Cardiac Rhythm Management (CRM) Specialist Nurse, Lister Hospital, University Hospital, Middlesbrough, and Dr Euan Berry (St George's Hospital, London) who looked at how to assess patients and identify those with a significant heart rhythm abnormality that may require treatment.

Assessing exercise safety in 'at risk' patients

The safety of exercising in patients with arrhythmias was discussed by Dr Matt Fay (Westfield Medical Centre, Yorkshire). He considered when it should be recommended and when it could be counter-productive, such as when the arrhythmia is asymptomatic.

What is a molecular autopsy?

The fast-developing field of molecular autopsy was addressed by Dr Hani Raju (St George's Hospital, London), who was the winner of the Young Investigator's Award (Basic Science). Dr Raju outlines plans for cheaper genetic testing, as part of a novel molecular autopsy strategy in sudden arrhythmic death syndrome.

NEWSLETTER SKYSCRAPER

Sponsored newsletter skyscraper 160 x 600 pixels (Flash, JPG or animated gif only). File size below 60k. Please provide with linking urls/documents (one preferred).

*WARNING: Microsoft Office Outlook 2007 does not display animated GIF files in the body of e-mail messages. Only the first frame of the animation appears. Recipients using Outlook 2007 will see ONLY THE FIRST FRAME of your animated GIF. It is suggested that you supply a non-animated ad for emails, or make sure all pertinent information is displayed in the first frame.

BJC Print Advertising Rates

The BJC is an excellent platform for advertisers to reach cardiologists, doctors and nurses in both primary and secondary care. Our advertising rates are competitive and provide sales and marketing teams with exceptional value.

Your advertisement has greater exposure through the high editorial to advertisement ratio – increasing the impact of your product. The BJC has attractive series advertising and special positions that can be booked in advance – ensuring the journal reaches your target market to your best advantage.

Terms & Conditions

The following are the terms and conditions of the agreement between the 'Publisher', MediNews (Cardiology) Ltd and the 'Advertiser' – the party who has booked the space within the journal or any supplements, reprints or associated print material.

1. All adverts are subject to the Publisher's approval. The Publisher reserves the right to decline to publish or to change the position of an advert at its discretion and without explanation.
2. Should the Publisher change the position, size or prominence of an advert without prior agreement with the advertiser then the advertiser will have the right to cancel the contract. The Publisher does not accept liability for any errors created by third party suppliers, printers or contractors or any inaccurate instructions from the Advertiser.
3. All adverts must comply to the technical requirements of the Publisher. Should any advert not appear or be withdrawn, omitted or be suspended due to the Advertiser, then the cost of the space for the advert will be paid for in full. - even though the advert will not appear.
4. All adverts must comply with the provisions and regulations made in the Medicines Act 1968 (as amended), or any Acts of the UK Parliament and the European Union and EEC regulations and laws that are applicable in the United Kingdom.
5. It is a material term of this contract that all adverts must comply with the British Code of Advertising Practice or, where appropriate, the ABPI Code of Practice and any other relevant codes of the Advertising Standards Authority.
6. The Publisher reserves the right to increase the advertising rates at any time or to amend the terms and conditions as necessary without warning and prior consent. In such an event the Advertiser will have the right to cancel the remainder of their contract without further charge.
7. The Advertiser will ensure that the publication of their advertisement does not breach or infringe, any contract, any trade mark, any copyright or render the publication, or the Publisher liable in any way whatsoever. The Advertiser will ensure that any information relating to the advert to appear in the publication will be accurate and true and that any pictorial reference – photographic or otherwise – will have the full consent of any living person, Company or Organisation with the reproduction rights, in order that the Publisher may reproduce the picture, photograph or copy in the publication.
8. The advertiser will fully compensate the Publisher with regard to any claim, proceedings or demand as a result of the publication of the advert.
9. Advertiser payment invoices are subject to payment within 30 days. The Publisher will be entitled to charge interest on late payments at 3% above the current base rate of interest. All remittance must be made payable to MediNews (Cardiology) Ltd.
10. Neither party will be liable to other for any act of terrorism, strike, flood or other act of God that may result in the delay or cancellation of the publication and termination of the agreed contract between the two parties.
